my.IPMA

Keeping track of your IPMA certificates

my.IPMA

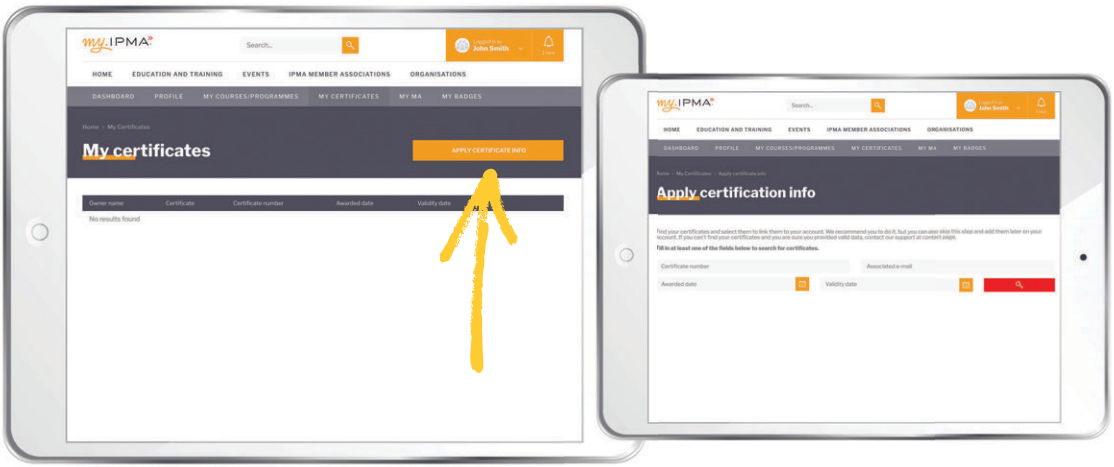
In collaboration with its local Member Associations, IPMA offers an internationally recognized competency-based certification for project, program and portfolio management designed for professionals at all levels of their careers. The certification is based on IPMA standards, and individuals can choose between 4-L-C, Agile Leadership, as well as Consultants, Coaches and Trainers Certification. My.ipma is here to:

- offer you different IPMA certification options in your country
- provide you with various options of continuous professional development and monitoring the status of your existing certificates
- help you become a recognised professional in the field.

Step 1:

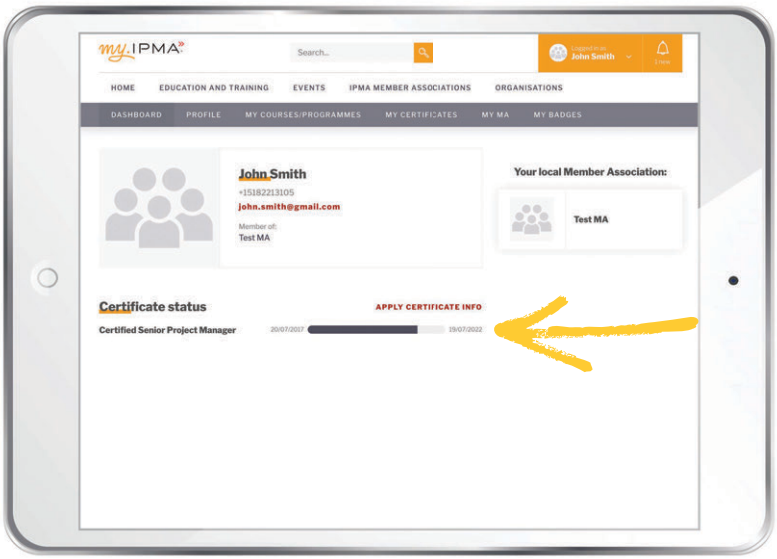
If you have already added your IPMA certificate/-s to your personalised IPMA account during registration, proceed to step 2.

If you did not add your IPMA certificate/-s to your personalised IPMA account during registration, go to My certificates. My.ipma platform will offer you all the certificates that match your last name. If you cannot find your certificate/-s this way, click the Apply certification info button and search for your certificate by entering certificate number, associated email, awarded and / or validity date.



Step 2:

Once you link your IPMA certificate to your personalized IPMA account, it will become visible within the My certificates tab and your Profile. Within your Dashboard you will be able to keep track of your certificate/-s status and time for re-certification.



Within the tabs My certificates and My badges, you will also have the option to claim and share your credential in a form of digital badge for every certificate you hold. Follow the steps in the *Obtaining and sharing digital badges* booklet and promote your achievement worldwide.
